

Fiber Optic Splice Protection Sleeves

We have various length and sizes splice protection sleeves in stock.

Descriptions

Huihong fiber fusion splice protection sleeves represent the industry's most popular sleeves due to its robust design and user friendly size. Most commonly used length are 40mm and 60mm with an after shrink diameter of 2.9mm and will accommodate fiber diameter up to 1.4mm. This product is constructed with an inner EVA meltable adhesive tube, stainless steel strength member and a polyolefin heat shrink outer tube. The tubes are transparent color to allow viewing the color of the fiber after splicing. The entire assembly is heat bonded to ensure that all members maintain perfect alignment during shipping, handling and shrinking. Our products are very competitive prices and we have most models in stock for immediate shipment.

Features

- Belcore GR-1380 Compliant
- RoHS Compliant
- Outer tube meets SAE AMS-DTL-23053/5 Class 2
- Inner EVA meltable adhesive tube
- Full length strength member for total fiber support
- Close dimensional tolerances
- Heat bonded assembly
- Open ended assembly minimizing possibility of air entrapment during shrinkage
